

CLAIRE_{RX}

ERBLER MT

Our new LED Wall **CLAIRE RX** is a robust, high definition curveable video display designed for the highest demands of exhibition and business needs.

It offers a unique curve-connection design which supports concave and convex building from -5° to +5°. With 7,8 kg per cabinet it's ultra lightweight and therefore perfect for standing and hanging constructions.

The very small pixel pitch opens new possibilities for very low viewing distance and a perfectly sharp and high definition picture. The unique premium „**BLACK PIXELS**“ deliver the deepest blacks and the glossiest whites, even in the brightest and highly light polluted locations.
